

Our animals are guaranteed to be healthy and fertile. To this end, we have our vet come and perform a health check on all animals sold. This happens within 30 days of pickup/delivery, and usually within 15 days.

We also guarantee our ewes and rams to be fertile. If any sheep receiving adequate care and nutrition (under the supervision of a vet experienced with small ruminant healthcare) fails to reproduce offspring its first season, we will, at our discretion, offer a replacement ewe or ram, or refund the purchase price. **A special note here on buying ewe lambs-- up to 30% of ewe lambs may not cycle their first fall and may undergo a higher rate of birthing difficulties. Bred ewe lambs will be sold only to farms with at least one lambing season experience. Our fertility guarantee does not apply to ewes under one year old.

We have had great experience with ram lambs as breeders, and guarantee them as well as our proven rams.
