

Several criteria affect our price scale for breeding stock. We take into consideration the overall conformation of the sheep, AI genetics, fleece quality, milkiness, and temperament/personality of the sheep. If a sheep has it all, then it would be in our highest price tier. All of the sheep we sell are of breeding stock quality, with pricing reflecting the very best to very good breeding stock. We do not sell any sheep that we would not be happy to keep. OUR CULLS ARE NOT SOLD TO ANYONE ELSE AS BREEDING STOCK.
