

Twin, black badgerface ewe. Daughter of AI sire Jonas. Mom is super attentive and great milker, so this girl is grew vey well. Super spunky! She has a good long and deep body, looking like she will carry forward the excellent conformation of the sire and dam. AI genetics are 89% from Jonas, Gosi, Lundi, Laekur, Raftur, Grani, Aboti. This ewe will carry spotting and has badger face pattern from the sire. Excited to have this girl, as she brings brand new genetics to the USA.

Sire: [AI Sire JONAS](#)
