

Single, white ram out of Goggles and new AI Sire Vali. Vali has excellent scores all around, so I have high hopes for this ram. AI genetics are 85% from Vali, Goli, Dropi, Grani, Hylur, Munkur, Bambi, Flotti, Udi, Grimur, Sponn plus a little Morro, Noi, and Molur. Carries solid as his second pattern and carries spotting. Vali is an AI sire that is unrelated to most of the other current AI sires, so his genetics are completely new to our flock. Beautifully muscled with deep leg muscle, excellent chest muscling and width, fine overall conformation, really good rump.
