

Fiber that is collected at the output of the carder in the form of a batt. Useful for felting, quilt filling, and some handspinners prefer their fiber in this form. We currently have batts available in a very dark greyish brown color. This is very high quality fiber that is quite soft. Icelandic fiber is highly sought after by felters, as it felts very easily, both for wet felting and needle felting. Picture coming soon. Available by the ounce.

\$ 2.25 per ounce.
