

A vigorous, solid black ram. Both the dam and sire on the larger side for the breed. Mom has huge fleece and sire has the meat build, so this ram is a nice mix of the two. Excellent mix of AI lines include 1/4 Grani, 1/8 Munkur and 1/16 Sponn from the sire, plus 1/32 Bambi, 1/64 Noi, Morro, Molur, Peli and Hunn from the dam, for a total of 55% AI genetics. Could carry moorit also from the dam and spotting from sire. Grew very well as a ram lamb and showed excellent parasite resistance. Gorgeous thick fleece with curl and even length. **Matched with 2 ewes for the 2012 lambing season:** Butterscotch and Tinkerbelle.

Born: April 29, 2011
