

Twin, solid black ram lamb out of some of our favorite AI lines: out of Lucinda, our AI Rektor daughter and Uncle Jese, an AI Goli son. This ram will likely also carry spotting, as both the sire and dam carry the spotting gene. Great AI genetics: Goli and Rektor grandson, plus Muli, Laekur, Bambi, Hylur, Noi, Morro and Sponn for a whopping 80% AI breeding. At 6 months, this ram lamb is showing excellent conformation, fleece and muscling.

Sire: [Uncle Jesse FFC 743Y AI Goli son](#)

Dam: [Lucinda AI Rektor daughter](#)

DOB: April 24, 2013
