

Twin, heterozygous white ram lamb. Son of AI sire Jonas. Mom is super attentive and great milker, so this guy is growing vey well. Super spunky! He has a good long and deep body, looking like he will carry forward the superb conformation of the sire and dam. AI genetics are 89% from Jonas, Gosi, Lundi, Laekur, Raftur, Grani, Aboti. This ram lamb will carry spotting and could carry badger face pattern from the sire. Excited to have this guy, as he brings brand new genetics to the USA.

Sire: AI Sire JONAS

Dam: [Mandy TCE-112D](#)

DOB: April 13, 2018

Photos current. June 15, 2019
