

Twin, black with flashing ram lamb. He carries 85% AI genetics from: Guffi, Bifur, Grani, Heli, and Flekkur on the dam side and Goli, Rektor, Muli, Laekur, Bambi, Hylur, Noi, Morro and Sponn from the sire. This ram is growing out very nicely with excellent conformation, nice wide chest and rear, lovely wool, and horns look to be nice and wide like those of the sire. He very likely carries spotting, as both the sire and dam do.

Sire: [Deniro KTB-526A](#)

Dam: [Faith KTB-505A AI Guffi daughter](#)
