

Twin. Super handsome moorit grey spotted ram. This is a son of AI sire Gramman. Very deep bodied ram, stocky. Nice body length, too. This ram carries 79% AI genetics: Gramman, Grabotni, Flotti, Haengur and Bambi. Expecting this guy to grow out to be a vigorous and long bodied ram, like the sire, and carry forward the excellent milking genetics of the dam. Beautiful wool and superb personality. Kimuson got 5 ewes to breed last fall.
