

## LEANN

Twin, sparkling white ewe lamb out of our Tinkerbelle and our AI Goli-son.. This ewe lamb is heterozygous white, meaning she carries only one white pattern gene and will be able to produce both colored and white lambs. LeAnn carries solid as second pattern gene and probably spotting. Long and deep body with nicely placed front legs and smoothly muscled shoulders and neck. Sire and dam are both excellent fleece lines. AI genetics are 70% from Alfur, Goli, Molur, Hylur, Grimur, Bambi, Noi, Morro and Sponn, Muli, and Heli. This ewe produced twins as a one winter ewe and they are growing really well. Excellent mother with a great udder.

Sire: [FFC-743Y AI Goli-son Uncle Jesse](#)

Dam: [BLW- 463X Tinkerbelle](#)

DOB: April 29, 2013

Lambing Record: 2 (OWE)
