

GARBO-GIRL

This ewe is such a pretty fawn moorit grey. She is out of Greta's line so she should be milky and friendly. AI genetics are 38% from Aboti, Flotti & Kani. Aboti had one of the highest ever scores for wool at the AI breeding station. Garbo-Girl also carries spotting. This beautiful ewe is from top milking lines at Dancing Lamb Icelandic Sheep Dairy. (Garbo-girl is a grand daughter of Greta (a Kani daughter), the all-time best Icelandic ewe at Dancing Lamb Farm. She was very prolific, producing many gorgeous lambs. She was the best pure-bred milker and her fleece was still amazing at 9.) Garbo-girl has a gorgeous fleece, beautiful udder, and nice build.
