

#91975, born 1991, is also from the Hestur Station. He is white with speckles on the head and is horned. Dropi is described by the South Ram AI station as having a long, strong head with a broad neck well connected to the shoulder. The shoulder is well muscled but rather narrow. He has a broad wide chest, a muscular rack, and his leg is muscular, big and deep. His feet are thick and his gut is big. In summary, he is a powerful ram with excellent leg muscles. His fleece is white, fine and curly with average quantity. There is tan on the back of his head, his tail and up along his back. Dropi carries color.
