

White, horned. Beautiful head and very well curved horns. Round and muscular shoulders, broad chest and good conformation. Strong back and extremely muscular. Very well muscled loins and rump. Great and muscularly round shaped gigots. Feet straight and well placed. Hylur is long bodied, vigorous and very muscular ram. **Wool** White with no tan or black fibers. Wool quantity above average, fine thog and even. A bit short woolled on back.

### **Results**

Hylur was progeny tested at Hestur Experimental farm in 2002. His progenies were extremely lean and muscular. In 2003 it was confirmed in lamb evaluation that Hylur carries on great meat qualities and good carcass grading. Hylur is without any doubt an excellent breeding ram and carries on the same meat qualities as his father, II 00-868.

**Color Inheritance** Hylur is homozygous white.
