

Grey mouflon with vigorous head and good horn curving. Broad, round shaped and very muscular shoulders. Very good rib shape. Broad and strong back and very muscular rump. Extremely good and well shaped leg muscles. Strong and well placed feet's. Longbodied and vigorously looking ram. Grabotni is a son of AI ram Grimur.

Even and good grey color. Average wool quantity. Thick and even thel but short thog with variable fineness.

Grabotni was bought to Southram because of very good results from his birth farm. His progenies have proofed to have very thick eye muscle, leanness and superb gigot muscling resulting in very good carcass grading.

Grabotni's have proven to be very prolific with very good milking abilities.

Colour inheritance: *Grabotni carries grey and mouflon as his color indicates as well as spotted. Grabotni also carries moorit.*
