

Triplet, white ewe lamb out of our AI Kunningi daughter, MaryAnn. This ewe lamb is heterozygous white, meaning she carries only one white pattern gene and will be able to produce both colored and white lambs. This girl will carry color, grey or solid for pattern and possibly spotting. The dam has gorgeous fleece and a great build, broad and chesty. Sire is very heavily fleeced with excellent conformation. AI genetics are 73% from Kunningi, Goli, Molur, Hylur, Bambi, Noi, Morro and Sponn.

Sire: [FFC-743Y AI Goli-son Uncle Jesse](#)

Dam: [BLW-922S MaryAnn](#)

DOB: April 18, 2013
