

As usual, Katey gave us beautiful twins, this time two ewe lambs. She is the most dependable ewe, excellent mother and super milky. Her twins grow to be some of the very biggest every year. These girls should be nothing short of stellar with AI grandsires Alfur and Laekur plus Noi, Grimur and Heli for a total of 67% AI. Great meat and fleece lines. We will be keeping one of these girls and selling Katey this year.
