STUD FOR OUR MAY LITTER: FOX MEADOW "BYLUR"

Read below for our puppy placement process.

Procedure: Our process continues to evolve but this is a general guideline/timeline for how we proceed.

Puppy information and photos are posted and updated weekly on our website (www.kindhornfarm.com) and the ISD official websites. All inquiries are contacted.

We recommend that you read and complete the questions in the application thoughtfully. Your answers will help us to evaluate puppy/home compatibility and ultimately determine puppy placements. We will take reservations or deposits once we have approved prospective owners/households.

At 6 weeks, once personalities have emerged, each puppy is temperament tested by a professional dog trainer/behavior specialist. We use this input to begin matching puppies to prospective owners/households, taking into account the interests of each prospective owner

while looking for the best fit. At 7 weeks placement determinations and travel arrangements are made. At 8 weeks the puppies are CERF tested and ready for delivery to their new homes and breeder contracts are signed.

At 8 weeks Kind Horn Icelandics' puppies are:

** Socialized – accustomed to people, especially children, introduced to the great outdoors, cats, collars and leashes, crate training, steps, nail clipping, and general household activities.

** AKC registered with documentation and pedigree provided.

** Wormed and have completed first round of shots @ 6 weeks with medical history provided.

** Micro-chipped with documentation provided.

** Temperament tested at 6 weeks and matched to appropriate homes

** CERF tested with documentation provided

** Members of the ISAA for their first year

Travel arrangements will be coordinated with the new owners however travel expenses are the responsibility of the new owner. Our first priority is the welfare of our puppies and finding them the most compatible homes – to that end we are as flexible and accommodating as possible.

PUPPY APPLICATION: please contact us.
